INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION CITY OF NEWARK, CALIFORNIA

The City of Newark is the Lead Agency pursuant to the California Environmental Quality Act (CEQA) and has performed an environmental review, consisting of an Initial Study, of the Project described below. The environmental review examines the nature and extent of any potential adverse effects on the environment that could occur if the project is approved and implemented. The City of Newark staff have reviewed the Initial Study for the project, and based upon substantial evidence in the record, finds that the proposed project could not have a significant effect on the environment with implementation of mitigation measures. Based on the review, the City has prepared a Mitigated Negative Declaration (MND) for this project. An MND is a statement by the City that the project will not have a significant effect on the environment if the project implements the protective measures (mitigation measures) identified during the environmental review.
